

Full-stack developer for IoT

Company: Terabee, High-Tech sensor and sensing solutions company

Location: France, Saint Genis-Pouilly, (Close to Geneva, next to CERN)

Contract: Full-time

Reporting to : IoT lead

Job Description:

Terabee is a dynamic and fast-paced technology company that designs, develops and manufactures the TeraRanger brand of sensors, bringing new ideas and unique solutions to robotics, automation, IoT and smart city challenges.

We are now seeking a motivated and self-driven Full-stack developer for IoT to join our growing team! You will operate within a highly stimulating and international environment. You'll be a team worker with a creative mind, a sense of initiative and an entrepreneurial spirit with a commitment to our long-term success.

Role and Responsibilities:

- You will be part of the design and development of an IoT architecture from the end device to the customer front-end. From device management to data gathering and visualization.
- Help select and implement existing components or coordinate with external subcontractors to build an IoT solution

Profile:

- You have experience on developing and running IoT web services both server-side or device-side
- You have knowledge in network protocols (HTTPS/MQTT)
- Knowledge of version control systems (preferably Git)
- Strong English language, spoken and written
- Self-driven and curious
- Enjoy challenging tasks and problem-solving

Good to have

- Unit testing experience
- DevOps experience
- Experience with Docker or other container system
- Experience with databases (SQL, time-series DB)

Please send your CV and a letter of motivation to careers@terabee.com with the subject line "Full-stack developer for IoT". We look forward to receiving your application.
