

Production Operator

Company: Terabee, High-Tech sensor and sensing solutions company

Location: France, Saint Genis-Pouilly, (Close to Geneva, next to CERN)

Contract: Full-time

Reporting to : Production Engineer

Job Description:

Terabee is a dynamic and fast-paced technology company that designs, develops and manufactures 2D and 3D Time-of-Flight sensors and thermal cameras, bringing new ideas and unique solutions to IoT/Smart Building, Industry 4.0 and robotics use cases.

We are now seeking a motivated Production Operator to join our growing team! You will operate within a highly stimulating and international environment and will play an active role in the manufacturing of high technology sensors.

Role:

- Assembly of optical sensors (including software flashing), using ultrasonic welding, laser cutting and 3D printing machinery.
- Maintain and enhance existing internal production processes and documentation in collaboration
- Tracking and reporting of activities within the inventory management system
- Utilise best practice Electrostatic discharge methodology during production process
- Ensure product quality and conformity throughout the production process
- Packaging of completed products / components for customer shipments
- Reporting of production activities and communication with the Production team.

Profile:

- BAC or equivalent
- Prior experience of working with electronic components / production an advantage
- Be able to work following procedures, documentations and rules
- Handworker with good care of details
- Self starter, able to work autonomously but within a team structure
- Familiarity with Google Suite business tools (Docs, Sheets, Slides, etc.) an advantage
- Good spoken and written English

Please send your CV and a letter of motivation to careers@terabee.com with the subject line "Production Operator". We look forward to receiving your application.
